

Construction Management: HVAC

PROGRAM DESCRIPTION

HVAC Degree Program

As one of the in-demand jobs nationally and specifically in Ohio with job growth projected at 15%, students will receive training in heating, ventilation, air conditioning and refrigeration; working towards industry recognized certifications and troubleshooting techniques to be job ready upon graduation. Students will gain on-the-job training from industry partners throughout the curriculum as well as in lab scenario training on installation and maintenance.

Students who successfully complete the HVAC program will:

- Apply understanding of and engage in safety practices essential to the construction trades.

- Perform planning and estimating for trade-based projects that ensure efficiency of project from concept to completion.

- Ability to perform calculations on heat loss and heat gain loads for residential and commercial structures.

- Demonstrate proficiency and a working knowledge of electrical components, mechanical components, sheet metal fabrication, piping and tubing.

- Analyze, test, troubleshoot, and repair components, circuits, and basic industrial systems.

EMPLOYMENT

Examples of Places where Hocking College Alumni have worked or are currently working include the following:

AirClaws, Accurate, Dean's Heating and Cooling, and David White.
